

## SPA TREATMENT IN SANDANSKI AND DEVIN

Sandanski is an internationally known climate therapy and health resort. It is situated in the valley of the Sandanska Bistritsa River, at the foot of the Southwestern slopes of Pirin.

Without exaggeration the climate of Sandanski can be described as unique. Throughout the year, air temperatures are higher than anywhere else in the country. The average annual temperature (14.7C) is the highest in Bulgaria. The winter is mild and short, and the autumn - long and warm. The relative air humidity is low (66 per cent), and the annual duration of sunshine is no less than 2,436 hours. Sandanski has the lowest annual rainfall in Bulgaria (127 litres per square metre) and almost no foggy days. The air is remarkably clean and pollution free.

Apart from its natural beauty, lush vegetation and remarkably wholesome climate, the resort also features a multitude of mineral springs. The mineral waters have a nearly uniform chemical composition but contain various quantities of metasilicic acid and fluorine.

This remarkable combination of balmy, health-giving weather and curative mineral waters makes Sandanski the perfect place for modern science-based climatotherapy, spa treatment, rehabilitation, primary and secondary prophylactics and recreation.
