

SPA TREATMENT IN BULGARIA

I. TOWN OF HISSAR - HOTEL “ AUGUSTA SPA“**** -

The health resort of Hissar is situated in the centre of Bulgaria, 160 km east of the capital of Bulgaria – Sofia.

Natural features

- Curative mineral water. There are 22 mineral springs with a total debit of 4000 l/min. and a temperature of 37-52 C. The mineral water is light, clear, colourless, flavourless and tasty. It is slightly mineralized, hypo- and hyper-thermal, with a predominance of hydro carbonic, sodium, sulphate and fluorine ions, as well as substantial amounts of radio radioactive gas.
- Climate: The climate is moderate continental with mild and warm winter. The average annual snow cover is 12 days. Spring comes early, summer is temperately hot with an average month temperature of 22 C. Autumn is warm and long lasting. Cloud coverage is low.

The town is ecologically clear. There are no industrial plants or factories in the region. It is rich in parks and green areas.

Hotel “ Augusta Spa” disposes with an outdoor pool with mineral water, water bar and Jacuzzi, sport – recreation center with a rich variety of procedures and complex programs – aromatherapy, talasotherapy, Eastern massage techniques, underwater and manual massages, and fitness program. The hotel offers excellent opportunities for congress tourism. Works all year around.

II. TOWN OF SANDANSKI –INTERHOTEL SANDANSKI ****

Sandanski is an internationally known climate therapy and health resort. It is situated in the valley of the Sandanska Bistritsa River, at the foot of the Southwestern slopes of Pirin. Without exaggeration the climate of Sandanski can be described as unique. Throughout the year, air temperatures are higher than anywhere else in the country. The average annual temperature (14.7C) is the highest in Bulgaria. The winter is mild and short, and the autumn - long and warm. The relative air humidity is low (66 per cent), and the annual duration of sunshine is no less than 2,436 hours. Sandanski has the lowest annual rainfall in Bulgaria (127 litres per square metre) and almost no foggy days. The air is remarkably clean and pollution free.

Apart from its natural beauty, lush vegetation and remarkably wholesome climate, the resort also features a multitude of mineral springs. The mineral waters have a nearly uniform chemical composition but contain various quantities of metasilicic acid and fluorine.

The remarkable combination of balmy, health-giving weather and curative mineral waters makes Sandanski the perfect place for modern science-based climatotherapy, spa treatment, rehabilitation, primary and secondary prophylactics and recreation.
